

# Key Machine Parts

Use this form to determine the parts for the key machine that you must keep in your shop. To help you identify the correct part there is a labeled drawing on the other side of this form.

The MODEL column is the amount of the part that you should have extra in your shop meaning that these extra parts are in addition to the parts that are actually being used on your machine now. For example the MODEL for "Perma Cutters" is 2, this means that there is 1 on each of your key machines and you have 2 in under stock.

Many parts have a MODEL of 0. These parts rarely need to be replaced, if ever. You should not have any of these parts in under stock and should only order one in the extremely unusual condition of needing one.

Parts must be ordered by calling Dale Harris at extension 152138.

<b>KEY MACHINE PARTS</b>			
DESCRIPTION	SKU#	MODEL	ORDER
